

Data Analyst

Meridian Retail Analytics | Mumbai, India (On-site) | Experience: 1-3 years

About the Role

We are seeking a detail-oriented Data Analyst to help transform raw business data into actionable insights. You will work with cross-functional teams to build dashboards, run statistical analyses, and support data-driven decision-making.

Key Responsibilities

- Extract, clean, and analyze large datasets using SQL and Excel
- Build interactive dashboards and reports in Tableau or Power BI
- Perform statistical analysis to identify trends and business opportunities
- Collaborate with marketing and sales teams to define KPIs
- Automate recurring reports using Python or VBA scripting
- Present findings to stakeholders in a clear, non-technical manner
- Maintain data integrity and documentation of analysis processes

Required Skills

- Strong proficiency in SQL for data extraction and querying
- Advanced Excel skills (pivot tables, VLOOKUP, macros)
- Experience with data visualization tools (Tableau, Power BI, or similar)
- Basic statistical knowledge (regression, hypothesis testing)
- Familiarity with Python or R for data analysis
- Strong analytical and critical thinking skills

Preferred Skills

- Experience with A/B testing and experimentation
- Knowledge of ETL processes and data warehousing concepts
- Exposure to Google Analytics or similar web analytics platforms
- Understanding of retail or e-commerce business metrics

Education

Bachelor's degree in Statistics, Economics, Business, Computer Science, or related field

Soft Skills

- Excellent communication and presentation skills
- Strong attention to detail
- Ability to translate data into business recommendations
