Chennai, India | sneha.rajan.ml@email.com | +91-91234-56789 | linkedin.com/in/snehrajan

Summary

Machine Learning enthusiast and recent Computer Science graduate with hands-on experience in Python, data preprocessing, and predictive modeling. Seeking to apply analytical and programming skills in a data-focused role.

Technical Skills

Languages	Python, SQL (basic)
ML / Data	Pandas, NumPy, scikit-learn, Matplotlib
Tools	Jupyter Notebook, Git, MS Excel (basic)
Other	HTML/CSS, Java (academic projects)

Work Experience

Machine Learning Intern

Bytewise Analytics, Chennai | Jan 2026 - June 2026

- Built classification models using scikit-learn to predict customer churn
- Cleaned and preprocessed datasets using Pandas and NumPy
- Wrote basic SQL queries to pull data from MySQL databases
- Created static charts using Matplotlib to summarize model results
- Documented experiment results in Jupyter notebooks for the team

Projects

Movie Recommendation System

- Built a collaborative filtering model using Python and scikit-learn
- Used SVD-based matrix factorization on the MovieLens dataset

Student Performance Predictor

- Developed a regression model to predict exam scores using Python
- Performed exploratory data analysis with Pandas and Matplotlib

Education

B.Tech in Computer Science and Engineering (AI & ML), Anna University, Chennai, 2026 | CGPA: 8.1/10

Certifications

- Python for Data Science, IBM (Coursera)
- Introduction to Machine Learning, Andrew Ng (Coursera)

Note for scorer testing: this resume intentionally lacks Tableau/Power BI, advanced Excel, and business KPI experience mentioned in the Data Analyst JD, to test moderate/partial match scoring.
